**TECHNICAL DETAILS**

- Our products are ideal for various sectors (colleges, hospitals, homes, catering establishment, etc).
- Made of polypropylene with special ANTIBACTERIAL treatment as it is a type of impact-resistant plastic, washed in industrial dishwashers and used for intensive daily use and high density polyurethane foam interior insulation.
- The only tray that can be stacked in one piece with the other in any possible way.
- Equipped with rings around plates and bowls to prevent odors and temperature loss when transported through the Center and with recesses for removing plates and/or bowls.
- Composed of two equal parts, upper lid and lower base, which can be used interchangeably, facilitating their use and storage, thus reducing work times.
- With accommodation for medication in the base part of the isothermal tray.
- Dishes separated by cutlery area to facilitate their use and with the possibility of coupling any existing crockery in the Center.
- The first and only tray with a card holder system integrated on the side so as not to use card holders or adhesive tape, but with lateral accommodation to place removable card holders if desired.
- The only tray that admits two 225 mm plates at the same time, as well as three types of bowls or bowls with lids at the same time, it also has capacity for fruit and a piece of bread of a suitable size. Specially designed for use in hospitals.
- Dishwasher safe. NOT suitable for microwave heating.
- It will withstand temperatures between -30° and 120°.
